

Proposal for the Rendille Work 2019

We thank the Lord for how he has enabled the work of the gospel to progress amongst the Rendille people over the years. A church has been established in Korr, which is the largest Rendille speaking centre. We sponsor primary schools in Lekuchula and Losidan, and an Early Development Centre in Korr. Gospel opportunities remain open in many villages and there are open invitations to plant churches in Lekuchula and Losidan. There are a good number of brethren who are labouring in these areas proclaiming the gospel of Christ. Recently we sent brother Stanley and his family to Korr where he has settled down. A permanent church building is almost complete there. We have been offered land in Losidan to put up a church building. Food has been distributed to this area a few times. All these and many more efforts being made compel us to double our efforts of the gospel for this community hence the need for this proposal.

1. Korr:

Korr has four men labouring there whom we support:

- Joseph Ogom
- Godana Dabalen
- Roygon Nadesol
- Stanley Musyoki

These men have injected a lot of effort in the work and we think it right to seek to increase their support. They now visit Lekuchula every Friday for the PPI and visit, and Losidan once a month for three days. We have been giving them additional 5K for these trips to cater for the fuel and other miscellaneous expenses.

Over and above the labourers, we also send support to a widow, an elderly couple who have been ostracized by the community, cook for the ECD, and use of the motorbike.

Recurrent expenditure in Korr will be 64K per month.

The church building need to be completed and a water tank installed. This requires at least 500K. This will encourage the brethren and consolidate further the efforts.

2. Lekuchula:

There is great need to work towards planting a church here. We are considering requesting brethren who speak Samburu to relocate here for this purpose, a family and a young man. Relocation and housing would be about 350K. A new motorbike is 120K. Monthly costs, including running the motorbike, would be 30K. At the school we support a teacher, the watchman, and cook at 9K.

The total costs for Lekuchula:

- Lekuchula recurrent: 39K
- Lekuchula fixed assets: 470K

3. Losidan:

There are two couples with an interest. Either could help in overseeing the wider work, since we now have the Yamaha DT 175 motorbike in good condition. A vehicle would be even more suitable. We support a teacher and cook at the school at 5K.

Housing would be about 250K, and a church building 500K. Monthly costs, including running the motorbike, would be 30K. At the school we support a teacher, the watchman, and cook at 9K.

The total costs for Losidan:

- Losidan recurrent: 39K
- Losidan fixed assets: 750K

Total expenditure:

Recurrent expenditure: **KES. 142,000 per month** (We already send, KES. 79.5K p.m. and only need 62.5K to implement this proposal.)

Fixed expenditure: **KES. 1,720,000** (Basically one off.)

[Approx £1 = 120 Kenya shillings, \$1 = 100 Kenya shillings]

In Christ,

Murungi Igweta
